

How to use a fare table

To calculate the price of an adult single:

1. **Find your route;** Coventry routes have a C prefix, some routes in Wolverhampton have an N prefix, some routes in Walsall have a W prefix and some routes in West Bromwich have an H prefix)
2. Once you are on the fare table for your route, **locate where you are beginning your journey** (or the nearest place before that)
3. Move directly **down the list of numbers below the place name and across to your destination** (or the nearest place after that) to locate your fare
4. Where the **horizontal and vertical lines/rows of numbers cross** is the fare that will be charged
5. Fares are shown in pence, so 100 = £1.00

Example: From **Walsall Bus Station** to **Bloxwich (High Street)**, on the X51, is **£2.40** on the X51. From **Stephenson Avenue/Green Lane** to **Hospital Street/Green Lane**, the fare would be **£1.50**.
